

STATEMENT OF PURPOSE

RS19554

Idaho Code 40-1415 provides for the responsibilities of a single county-wide highway district within cities. Idaho Code 40-1415(7) reserves to a city the right to place and maintain landscaping in the public rights of way. In addition, 40-1415(8) also reserves to a city the right to place and regulate parking meters located in public rights-of-way and keep all revenues generated from the parking meters.

The purpose of this legislation is to require a city located within a single county-wide highway district to expend the collected parking revenues for the placement and maintenance of landscaping in the public rights-of-way. This legislation supports the public policy that any revenue generated from a public asset should be reinvested in the public's asset.

FISCAL NOTE

There is no impact on the General Fund of Idaho.
